Summary

Data Analyst with a solid STEM and research background, experienced in SQL, Python, Power BI, and data analysis for operational and strategic decision-making. Skilled in building forecasts, creating dashboards, validating datasets, and performing ETL processes. Currently supporting sales and inventory strategy as a Data Analyst at Harris Seeds. Strong analytical thinking, data cleaning skills, and the ability to identify trends, anomalies, and insights in large datasets.

Skills

- STEM background
- SQL (SSMS)
- Data cleaning, ETL, EDA
- Statistical Analysis
- Forecasting
- Regression analysis
- Modeling
- Strong data visualization skills
- Python, Power BI and Tableau

Experience

Data Analyst (remote) *Harris Seeds, Rochester, New York, USA* March 2025 - Present

- Analyzed multi-season sales data and created forecasts for the 2026 season using Python (regression, smoothing techniques).
- Queried, cleaned and validated large datasets using SQL in SSMS and Acumatica.
- Built Power BI dashboards to visualize product performance, inventory and revenue trends.

Doctoral Researcher *CONICET, Bahía Blanca, Argentina* 2019 - 2024

- Increased microalgae biomass yield by 30–95% through data-driven experimentation and statistical analysis.
- Proficient in research, experimental design, statistical analysis and extensive bibliographic reviews.
- Published in peer-reviewed journals and presented findings at national and international conferences.

Pastry Sales Entrepreneur (Hobby) *Fraiel-Pastelería*

- Managed a home-based pastry business with strong time management and attention to detail.

Data Analytics Projects

- **HR project: Predicting Employee Attrition with Machine Learning** Developed a Random Forest classifier in Python to predict employee turnover, including data preprocessing, feature engineering, model evaluation, and clear project documentation available in the GitHub repository.
- **Bike-Share Company - BI Analysis:** Used SQL to analyze bike usage, identify differences between casual riders and members, and provide insights to boost membership conversions.

Education

Universidad Nacional del Sur, Argentina

[Graduate Courses](#)

- PhD in Biology – [PhD Thesis](#) 2019 – 2024
- Higher Diploma in Renewable Energy Economics 2021 – 2022
- Degree in Biological Sciences (6-year program) 2010 – 2017
